## Year 7 Humanities: Maps and Scale

Class: $\qquad$ Name: $\qquad$

Maps need to be an exact copy of the real thing, otherwise what's the point. To ensure that the map sizes are an exact reflection of the real world, we scale them to the exact size and show this size as a Representative Fraction 1:50,000.

Large scale maps, say 1:10,000 cover relatively small regions in great detail and small scale maps, say $1: 10,000,000$, cover large regions such as nations, continents and the whole globe.

## 1:10,000,000 Large Scale

For maps that show large areas but have little or no detail.

## 1:25,000 Small Scale

We can see most roads and buildings.
Often used for motorists.

1:2,500,000
Now we are starting to show some details like cities and major roads.

1:3,000
We can see buildings in very high detail. However, the map is not really useful

$\qquad$ Name: $\qquad$
1:50,000 Is the most common map scale used. At this size, can see lots of detail but the map can still cover a large area.

If we want to use a map this size we need to understand scale. So how is it done?

## 1 cm on the $\xrightarrow{\longrightarrow} 1: 50,000 \longleftarrow 50,000 \mathrm{~cm}$ in map real life

If we want to measure that in kilometers, we know that:
$50,000 \mathrm{~cm}=500 \mathrm{~m}=.5 \mathrm{~km}$
$100 \mathrm{~cm}=1 \mathrm{~m}$
$1000 \mathrm{~m}=1 \mathrm{~km}$

## Try this:

Scale 1:200 (every 1 cm on map $=200 \mathrm{~cm}$ in real life size)

|  | DRAWING SIZE | REAL LIFE SIZE |
| :--- | :--- | :--- |
| Slide | 1.7 cm |  |
| Table | 0.8 cm |  |
| Bench |  | 1.2 m |
| Flower bed | 1.1 cm |  |
| Youth club building | 7.5 cm |  |
| Football pitch |  | 8.9 m |
| Soft play area | 4.2 cm |  |
| Running track |  | 12 m |
| Swings | 1.4 cm |  |
| Roundabout | 2.3 cm |  |

1. A map scale is $1: 1500$ If the distance on the map is 500 cm , what is the actual distance?
2. 

A

A-B measures 16 cm and the scale is $4: 4000$. What is the total length in metres?
3. A man walks 1500 metres. On a map this is shown as 3 cm . What is the scale on the map?

Fitting furniture

Name
Class
My room
This is a plan of your new bedroom. How will you arrange your furniture?

1 The side of each small square represents 20 cm in real life.
a How long is your bedroom, in metres? $\qquad$ m
b How wide? $\qquad$ m
c What is its area? $\qquad$ sq m

2 Now draw each piece of furniture to scale on the squared paper below.

Draw them close together. Do the largest ones first.

3 Label each item, and cut it out.
4 Place the furniture on the room plan. Move it around until everything fits.

```
Leave room for doors, drawers and cupboards to open!
```

5 When you are happy with the result, stick the furniture in place.

| My furniture |  |  |  |
| :--- | ---: | :--- | ---: |
| bed | $200 \times 100 \mathrm{~cm}$ | bedside table | $40 \times 40 \mathrm{~cm}$ |
| desk | $120 \times 60 \mathrm{~cm}$ | wardrobe | $60 \times 50 \mathrm{~cm}$ |
| bookshelf | $100 \times 30 \mathrm{~cm}$ | chest of drawers | $100 \times 50 \mathrm{~cm}$ |
| computer table | $80 \times 60 \mathrm{~cm}$ |  |  |

|  |  |  |  |  |  |  |  |  |  |  | . |  |  |  |  | $1$ |  |  | $\square$ | $\square$ |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  | . |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  | - |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  | : |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
